

RABC

Policy Statement

RABC Policy Statement

Micronclean has history and experience of technical competence and understanding of the laundry process. We are committed to providing processed textiles with a microbiological quality appropriate for the intended use. Our Risk Analysis Biocontamination Control system is achieved using the framework and principles of BS EN 14065:2016.

We commit to this standard being achieved by everyone. We will:

1. Identify the microbiological hazards associated with each step of the process.
2. Assess and classify the levels of risk of microbiological contamination.
3. Implement control measures to eliminate or reduce the risks of microbiological contamination.
4. Determine the control points to eliminate or reduce the risks.
5. Set limits at each control point and establish testing to monitor the control points.
6. Undertake corrective actions when an environmental condition is not under control.
7. Create procedures to verify that the system is working effectively.
8. Produce and maintain appropriate documentation.
9. Identify, fulfil and evaluate awareness and competency training for employees.
10. Set RABC objectives within a culture of continual improvement.

Our policy statement outlines the commitment of our company to achieve the requirements of the RABC quality management system.
